Notes for June 2008 Good knowledge for whole course.	

Joom-Reports is universal component for online reporting of a user or a group of users scores for completion of an assigned task, course etc. This component can be used in a school, business office or by online education providers. The reports will be prepared by a teacher/facilitator for parents/managers.

How it works for a school?

Information access levels regulated so parents can only see reports for their kids. The kid can only see his scores. The teacher can only provide reports to the kids in his class. The school administrator can see and modify reports for all kids in the school. Reports can be modified from the admin panel or from the front page.

Our component build on AJAX technology that makes creating reports easy.

The User roles can be modified from the admin panel. The report forms can be modified as static Joomla content. Even beginners can create a form using WySIWYG editor.

Setting up Joom-Reports.

First we need to setup users profiles in the component.
Go to Joomla admin panel / components.

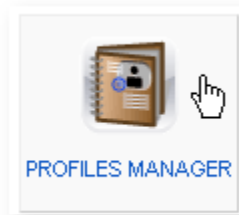

Click on
Joom-
Reports.

The screenshot shows the Joomla! administrator interface. At the top, there is a navigation menu with items: Site, Menus, Content, Components, Extensions, Tools, Help. On the right, there are utility icons for Preview, 0, 1, and Logout. Below the menu is a 'Back' button. The main content area is titled 'Joom-Reports Control Panel' and contains a grid of icons for various management functions: ROLES MANAGER, PROFILES MANAGER, PERIOD MANAGER, REPORTS MANAGER, COURSES MANAGER, GRADES MANAGER, ACHIEVEMENT MANAGER, and SHOW REPORT. There is also an 'About Joom-Reports' icon. To the right of the grid is a 'Joom-Reports Component' information box containing the following details:
